Construction

Metal foil resistor material is bonded onto a 96% alumina substrate and protected. Wrap-around terminations have an electroplated nickel barrier and solder coating. 0603 size parts have the foil on the upper surface whilst 2817 size parts have the foil on the lower surface.

Marking

0603 size parts are not marked. 2817 size parts are marked with ohmic value only. Reels are marked with type, value, tolerance, date code and quantity.

Solvent Resistance

The body protection is resistant to all normal industrial cleaning solvents suitable for printed circuits.
