

Roxspur Measurement & Control is committed to ensuring that all its activities and services aim to minimise the direct and indirect impact on the environment.

It is the policy of Roxspur Measurement & Control to comply with the terms of the Environment Agency 'Waste (England and Wales) Regulations 2011'; including subsequent legislation. To assist us in meeting this objective, we have adopted the following environmental practices.

- Aim to provide, maintain and ensure that all working conditions and practices comply with all the relevant legislation, as a minimum and where appropriate and practical improve on this position.
- Minimise the generation of waste and in particular hazardous materials will be stored, handled, transported and used or disposed of with the utmost care, so far as it is reasonably practicable.
- Replace where practicable, substances that are harmful to the environment with environmentally friendly alternatives.
- Other waste, which can be recycled, will be segregated and returned to the industry by reputable dealers.
- Avoid contaminating the environment or creating a nuisance.
- Work to reduce the amount of energy consumed.
- Adopt wherever practicable, designs and operational methods which minimise harm to the environment.
- Seek continual improvement in environmental performances, and co-operate with customers and suppliers in minimising their environmental impact.
