
STATEMENT OF POLICY

At TT Electronics we are committed to working with our employees, industry and regulatory bodies to protect the environment by reducing the environmental impacts associated with our manufacturing operations.

Together we will:

- Ensure we comply with all regulatory and TT Electronics requirements whilst undertaking operations.
- Set objectives and targets on a risk based approach that prioritises controls and programs for critical risk.
- Work with stakeholders to provide solutions and components that result in more environmentally friendly products.
- Engage with our employees to promote responsible environmental practices.
- Commit to implementing measures to prevent pollution to air, land and water by the following actions:
 - Reduce our disposal of waste to landfill and work with other registered bodies to increase recycling of waste materials.
 - Monitor our green house gas emissions to raise awareness of the impact we have on the environment.
 - Participate in carbon reduction schemes to reduce our carbon footprint.
 - Minimize the impact of water discharge from site process and monitor to ensure compliance.
- Manage, maintain, review and continually improve a management system which includes identification and evaluation of the environmental risks associated with our business activities.
