

Digital Liquid Turbine

DS1011

Features:

- Accurate, battery-powered
- Suitable for low to medium viscosity liquids
- Range of construction materials (nylon, PVC, PVDF, aluminium, stainless steel, bronze) and end fittings
- Many models are ATEX certified for hazardous areas

Description:

RM&C can provide an extensive range of accurate battery powered digital turbine flow meters, suitable for low to medium viscosity liquids, available in a choice of construction materials and end fittings. Many GPI Digital Flow Turbine models are ATEX certified for hazardous areas and are available in a choice of materials including: Nylon, PVC, PVDF, Aluminium, Stainless Steel and Bronze.

Applications:

- Flow visualization

Connections	½" - 2" NPT or BSPT
Flow Ranges	4 - 760 L/min
Accuracy	Down to ±0.75% of reading
Material Options	Nylon / Aluminium / Stainless Steel / Brass / PVC / PVDF
Power	Lithium batteries suitable for 2000 hours of LCD display External power module available (Auto powers off when not in use)
Temperature Range	-40°C to 120°C
Display	Local or remote mount
Totaliser	4-20mA/pulse output available
