

Infrared Light Emitting Diode

OP205CL

Features:

- High power GaAIAs
- Narrow beam angle—near parallel beam
- 875 nm wavelength
- TO-46 package
- Wide operating temperature range

Description:

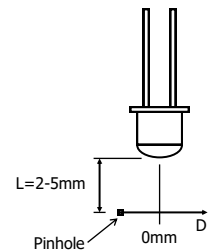

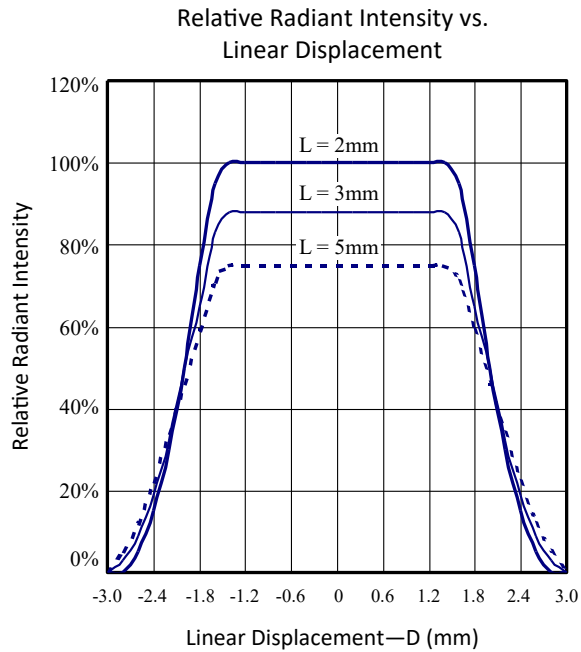

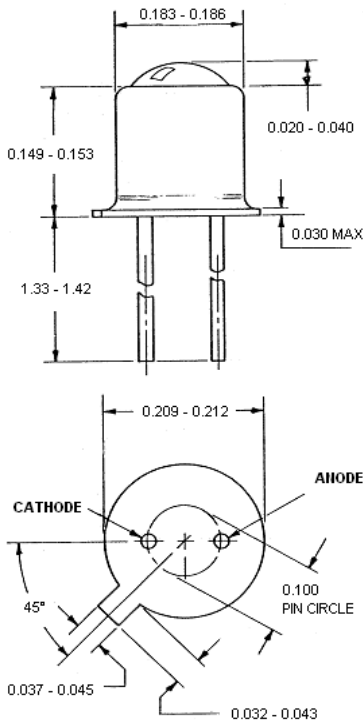

The **OP205CL** is a high efficiency GaAIAs infrared LED mounted in a TO-46 metal can package. The device features a special dome lens that allows a very narrow beam angle. The result is a near parallel beam that is useful in applications that requires a collimated light source with a uniform intensity pattern.

OP205CL LED is mechanically and spectrally matched to OP800 series phototransistors.

Applications:

- Optical encoders
- Triangulation sensors
- Long distance sensing
