

Power Inductors

HM78M series

Features:

- Operating Temperature Range -40°C to $+125^{\circ}\text{C}$
- Ambient Temperature, Max $+85^{\circ}\text{C}$
- Temperature Rise, 40°C
- Operating Frequency up to 3MHz

Description:

The HM78M series of power inductors is ferrite based, magnetically shielded, and features low resistance values. It is shielded but has a low DC resistance and high saturation current, able to meet 125°C , with a maximum temperature rise of 40°C . This series has wide range of inductances from $1\mu\text{Henry}$ to $680\mu\text{Henry}$ and is comprised of two package sizes which is 10 and 20. The HM78M is ideal for high power density applications where size is critical and ambient temperature is less or equal to 85°C . It is designed for high switching frequencies up to 3MHz as well as for EMI and low pass filters.

Applications:

- Buck DC-DC converters
- High efficiency DC-DC converters used with battery supply
- EMI inductance in PI filters

HM78M-20471LFTR	470.0	3010.0	0.26	0.35
HM78M-20681LFTR	680.0	4630.0	0.22	0.30

- Notes: (1) Isat is the saturation current at which inductance rolls off at 35% max from its initial (zero DC)
 (2) Irms is the approximate current at which $\Delta T = 40^\circ\text{C}$ max
 (3) Test condition 100kHz @ 0.25V, 25°C

Outline Dimensions (mm)
