Introduction

This file contains PCN information for the product(s) referenced by the file name.

Note that the file may contain multiple PCNs. If this is the case, they are arranged in chronological order, so to see the most recent PCN scroll to the end.

General Note

TT Electronics reserves the right to make changes in product specification without notice or liability.
All information is subject to TT Electronics' own data and is considered accurate at time of going to print.

Description of Change	TT Electronics is relocating the back end visual, test and package LRC & TFS processes from our facility in Matamoros, MX to our facility in Mexicali, MX.
Description of Change (Continued)	
Reason for Change	The move helps mitigate rising production costs for the LRC & TFS product lines.
Implementation Plan	TT electronics will build approximately 2 months of safety stock through Dec 31, 2014. On Jan 1 2015, equipment will be disconnected and relocated to Mexicali. TT electronics will validate product and process in Mexicali per customer specification.
Customer Impact	TT electronics will notify active customers.

Resistors Product Change Notification

PCN Number and Title	2015-RBU14: Notice of design and process changes to LRZ Series 'High Current Jumper Chip' product manufactured in USA.		
Notification Launch Date	June 16, 2015		
Type of Change	☐ End of Life Notification ☐ Manufacturing Facility Change or Addition ☐ Datasheet Specification Change ☐ Other: <i>Qualification of Additional Ceramic Vendor</i> ☐ Material Change ☒ Process Change ☒ Design Change		
Manufacturing Location(s) Affected	Corpus Christi, TX USA	Date of Change Implementation	July 1, 2015

Products Affected		
Product Family	Datasheet Link(s)	Comment
LRZ Series	http://www.ttelectronicsresistors.com/datasheets/LRZ.pdf	1206, 2010, 2512 sizes

Description of Changes	- Individual chip marking is changing from 'R000' to 'LRZ'. Marking is not defined on datasheet. - The termination width on 'film side' of the chip is being narrowed by 0.008" (0.004" from each side). Termination pad width is not defined on datasheet. - Process is changing on 1206 chip to print two layers of conductor on the termination areas (instead of one) and print a single layer of epoxy (instead of two). <i>There is no change to form, fit, or function of the finished product as described in the datasheet. This notice is for informational purposes only.</i>
Reason for Change	- The marking change is for scrap reduction related to visual defects in the printed '0's. - The termination pad narrowing is for reducing scrap related to printing conductor in the scribe street and subsequently plating solder on the edge of the chip. 1206 printing process change is for mitigating occasional 'tombstoning' issues when customers uses the product.
Implementation Plan	IRC is committed to have a clean date so material with and without the changes is not mixed.

Customer Impact	Customer impact should be limited to possibly having to re-program visual equipment for the new chip marking 'LRZ'.
Recommendations	As this notice is provided for information purposes only, no recommendations are required.

Change Detail		
Description of Change	TT electronics is relocating the front end processes from our facility in Corpus Christi, USA to our facility in Mexicali, MX. This relocation is a continuation of the back end process relocation to TT electronics, Mexicali in 2015.	

Reason for Change	The relocation helps mitigate rising production costs for the Thickfilm Product Line Series.
Implementation Plan	TT electronics will build approximately 7 months of safety stock through December 31, 2016. On January 4, 2017, equipment will be disconnected and relocated to Mexicali. TT electronics will conduct product validation in Mexicali as per AEC - Q200 REV D specifications and requirements.
Customer Impact	TT electronics will notify customers via PCN-2016-RBU04. The 7 month safety stock, standardized training and integrated Program Management teams will prevent any supply chain disruptions to the customer.

Change Detail	
Description of Change	TT Electronics currently manufacture the affected product series' in both Bedlington and Mexicali. Manufacture of these parts is being consolidated into only the Bedlington plant
Reason for Change	Manufacture of these parts is being consolidated into only the Bedlington plant There is no difference in form, fit or function between Mexicali and Bedlington manufactured parts.
Implementation Plan	TT electronics Mexicali will transfer all backlog of the affected part numbers to TT Electronics Bedlington. Any new orders will be manufactured by TT Electronics Bedlington
Customer Impact	TT electronics will notify customers via PCN-2018-RBU11. All open customer orders will be manufactured and supplied by TT Electronics Bedlington. Any new orders will be manufactured by TT Electronics Bedlington. Standard packing quantities (pieces per reel) will be honored for open orders. Any future orders will be packed in 1000 3000 reels (1206 & 2010) & 1800 reels (1225 & 2512) only. Expected lead times are as follows: 6 weeks on past due orders Original commit date on open order book providing commit date is >6 weeks out 14 Weeks LT on new orders
Recommendations	Customers can continue ordering through their existing channels or can place orders direct onto the Bedlington factory, using their existing part numbering. There is no difference in form, fit or function between Mexicali and Bedlington manufactured parts

Change Detail	
Description of Change	LRZ is currently manufactured in conventional and flip chip format and in future it will be manufactured only in standardized flip chip format.
Reason for Change	Product standardization.
Implementation Plan	Visual inspection amendment and data sheet update.
Customer Impact	For any size from this PCN any order might be delivered either formats with white or blue side up till the end of the current stocks.
Recommendations	Update visual inspection.
Availability of Previously Manufactured Product	Former release will be shipped until available stock is depleted.
