## REACH 191

August 07, 2018

IRC has identified the need to provide sufficient information on substances included in Annex XIV and Annex XVII of the REACH regulation Substances of Very High Concern (SVHC). IRC's compliance program to date has not identified any substances from the SVHC candidate list issued June 27th 2018 (REACH 191) that are intentionally added to the above referenced product and in excess of the published tonnage limits.

The SVHC candidate list has been updated as of June 27<sup>th</sup> 2018 (REACH 191) and IRC expects that there will be no SVHCs contained in our products defined as *Articles* under the REACH Regulation. However, IRC will continue its program to assure the latest SVHCs are not intentionally added to our products, or to the associated packaging.

Important note: lead and lead free versions of our devices are available. Customers are required to request lead free terminations in order to meet Reach 191 requirements.

Feel free to contact us, should you have any questions or concerns.

Thank you for your cooperation in meeting our mutual goal of obtaining regulatory compliance.

Sincerely,

Joe Alvirde  
Quality Manager
