

## REACH Statement of Compliance

Semelab is a downstream user and does not use any substance of more than one tonne per year (other than exempted process gases).

Semelab is not a manufacturer or importer of substances or chemicals, so is not required to register or pre-register under the REACH regulations of directive.

We do not believe we use any substance of very high concern within the meaning of REACH.

We continue to work with our suppliers in ascertaining the registration status of the substances and preparations that we use. To date we are not aware of any issues
