

Fast Facts

Overhaul & Repair Services

TT electronics brand AB Connectors offers a complete portfolio of services, delivered by experienced professionals across the UK which provides an effective way to evolve customers' existing rail investments. This represents the most cost effective way to meet new regulatory or technical demands without excessive investment requirements. Our end to end service is tailored to meet your needs whilst ensuring full product compliance and performance is never compromised.

Service Segments

Overhaul - upgrade of existing systems to either refresh and/or add new connectivity requirements
Repair - Inspection and evaluation of defective or degraded interconnect systems together with certified remedial work.

Typical Applications

- **Rolling Stock**
 - Intercar Jumpers
 - Autocouplers
