AEROSPACE AND DEFENSE

“Having worked with the team at TT Electronics for some 17 years across a vast array of vehicle and sub-system projects, you have never failed to deliver.”

BAE Systems

OUR PURPOSE

To engineer and manufacture electronic solutions enabling a safer, healthier and more sustainable world.

TT Electronics engineers advanced electronics that benefit the planet and people for future generations. We do this by designing, manufacturing and working in a way that is safer, healthier and more sustainable.

WHAT MAKES US DIFFERENT?

More than a manufacturer

From design to system integration, we are your turnkey solutions partner, specialising in complex, high-mix electronics.

Technology with purpose

For more than a century our products have empowered customers to boost performance, competitiveness and scale.

Deep industry knowledge

We know what it takes to enable innovation and accelerate time to market in highly regulated markets.

Global continuity assurance

Manufacturing from three continents we help customers build resilient supply chains that ensure global business continuity.

OUR PRODUCTS AND SOLUTIONS

Our product and technology capabilities are supported by extensive in-house design, engineering, manufacturing and test expertise. We offer a comprehensive range of customised solutions, from individual components to fully integrated, complex systems and assemblies.

Power Conversion | Contract Manufacturing | Magnetics | Sensing | Optoelectronics | Complex PCBA | Microelectronics | Passive Components

From the smallest component to the largest, most complex assembly, we design, engineer and manufacture high reliability electronics for regulated markets.

HELPING SHAPE THE FUTURE OF HEALTHCARE

At TT Electronics, we engineer and manufacture electronic solutions that enable a safer, healthier and more sustainable world. We operate from 20 locations with over 4,000 employees.
